PROFESSIONAL SUMMARY

Data Analyst and Power BI Developer with hands-on experience in Python, SQL, Power BI, Excel, and data visualization. Experienced in data cleaning, exploratory data analysis (EDA), statistical analysis, data modeling, DAX, and interactive dashboard development. Built end-to-end analytics solutions across sales, e-commerce, customer behavior, business performance, and customer churn. Completed the Digital Egypt Pioneers Initiative (DEPI) Microsoft Data Engineer Track, with practical exposure to machine learning, data engineering, Azure fundamentals, and cloud-based data workflows.

EDUCATION

Bachelor of Business Administration | International Academy for Engineering and Media Sciences (IAEMS) — Cairo, Egypt

Graduation: June 2026 | Very Good Standing

Relevant Coursework: Business Statistics, Data Analysis, Market Research, Consumer Behavior, Digital Marketing, Business Communication

EXPERIENCE

Data Analysis & AI Tools Trainee | Orange Digital Center Egypt

2026-08 – 2026-09 | Cairo, Egypt

- Completed hands-on training in data analysis and AI-assisted analytics, covering data cleaning, exploratory data analysis, visualization, predictive analysis, and AI-powered reporting.
- Worked with Python, Pandas, Google Colab, Power BI, Tableau Public, Google Sheets, ChatGPT, and Gemini.
- Applied data cleaning, EDA, visualization, and predictive analysis techniques to real-world datasets.
- Built interactive dashboards and presented analytical findings using data visualization and storytelling techniques.

Independent Data Analytics Projects

Dec 2025 – Present | Remote

- Delivered end-to-end analytics solutions using SQL, Python, Excel, Power BI, and SPSS, transforming raw datasets into actionable, stakeholder-ready insights.
- Streamlined data cleaning, exploratory data analysis (EDA), and interactive dashboard development, improving data quality and decision-making speed.
- Authored data-driven business reports and recommendations from real-world datasets, strengthening client decision-making.

Research Data Analyst | International Academy for Engineering and Media Sciences (IAEMS)

Feb 2026 – Jun 2026

- Designed and executed a quantitative consumer behavior study of 64 participants, uncovering key drivers of promotional strategy and perceived value.
- Applied SPSS-based statistical analysis, including regression modeling and hypothesis testing, to quantify promotional impact on customer perception.
- Presented research findings and actionable recommendations to stakeholders, directly informing business strategy.

DEPI — Microsoft Data Engineer Track | Ministry of Communications and Information Technology (MCIT), Egypt

Jun 2025 – Dec 2025

- Completed an intensive, government-backed training program spanning Python, SQL, Power BI, data engineering, Azure fundamentals, and machine learning.
- Built and delivered multiple hands-on graduation projects demonstrating applied data engineering and machine learning expertise.
- Partnered with peers and mentors to design data-driven solutions, strengthening collaborative problem-solving skills.

TECHNICAL SKILLS

Programming: Python, SQL

Data Analysis: EDA, Data Cleaning, Data Profiling, Statistical Analysis, PivotTables

BI & Visualization: Power BI, DAX, Power Query, Dashboard Development, Data Modeling, Star Schema

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Machine Learning: Logistic Regression, Decision Tree, Random Forest, KNN, GridSearchCV, ROC-AUC

Databases: MySQL, PostgreSQL, SQL Server, SQLite

Statistics: SPSS, Regression Analysis, Hypothesis Testing

Excel: PivotTables, PivotCharts, VLOOKUP, INDEX-MATCH, Conditional Formatting, Slicers

Tools: Jupyter Notebook, VS Code, Git, SPSS

Languages: Arabic (Native), English (Professional)

PROJECTS

Brazilian E-Commerce Performance Analytics Dashboard (Olist)

Tools: Power BI Desktop, DAX, Power Query, Star Schema, Bing Maps

- Built a 5-page interactive Power BI dashboard on 100K+ orders across 9 datasets using a star schema model, surfacing key business KPIs: Total Revenue (16.01M BRL), AOV (160.99), Average Review Score (4.09).
- Engineered advanced DAX time-intelligence measures (CALCULATE, RANKX, TOTALYTD) powering seller ranking, revenue trend, and logistics KPIs.
- Mapped geospatial revenue via Bing Maps, identifying SP state as 69.9% of total revenue and exposing an 8.87-day average delay with an 8% late-order rate.
- Applied a dark glassmorphism UI with cross-page slicers, bookmarks, and drill-through navigation for an executive-ready BI solution.

Telco Customer Churn Prediction — End-to-End ML Pipeline

Tools: Python, Pandas, Scikit-learn, Matplotlib, Seaborn

- Built a complete machine learning pipeline from data preprocessing through model evaluation to predict customer churn.
- Identified key churn drivers — tenure, contract type, monthly charges — through exploratory data analysis.
- Compared Logistic Regression, Decision Tree, Random Forest, and KNN, tuning with GridSearchCV to reach 84.21% ROC-AUC.
- Delivered feature-importance visualizations translating model results into retention strategy recommendations.

Chinook Music Store Analytics — Multi-Page Power BI Dashboard

Tools: Power BI, DAX, SQL (Chinook Database), Bing Maps, Drill-through

- Built a 9-page Power BI dashboard spanning Sales, Customers, Music, Artists, Employees, and Countries with consistent DAX measures.
- Implemented drill-through pages for customer- and country-level analysis, surfacing AOV, invoice count, and geospatial sales data.
- Delivered genre insights (Rock 45.79%, Latin 21.17%) and identified Iron Maiden as top artist across 275 total artists.

Global Super Store Sales Analytics — Power BI Dashboard

Tools: Power BI Desktop, DAX, Power Query

- Built a Power BI dashboard analyzing \$2.30M in sales (2015–2018), revealing 52% YoY growth (\$0.48M → \$0.73M).
- Delivered segment analysis (Consumer 50.56%, Corporate 30.74%, Home Office 18.7%) and profit KPIs (\$286K profit, 12% margin).
- Surfaced city-level breakdowns identifying New York City (\$256K) and Los Angeles (\$175K) as top markets with interactive filtering.

Student Performance Intelligence — Streamlit Analytics & ML Dashboard

Tools: Python, Pandas, Scikit-learn, Streamlit, Plotly, Joblib

- Built an end-to-end student performance analytics solution using 30,641 student records, combining PostgreSQL, SQL, Python, Power BI, and Streamlit.
- Developed a multi-output machine learning pipeline using RandomForestRegressor and MultiOutputRegressor to predict Academic Index and Overall Performance.
- Prepared categorical features using LabelEncoder and created reusable label mappings for integration with the Streamlit prediction interface.
- Developed an interactive Streamlit prediction application that accepts academic, attendance, behavioral, study, and demographic inputs and generates performance predictions.
- Designed staging and data warehouse components in PostgreSQL and performed SQL-based analysis to support student performance insights.
- Created analytical visualizations exploring performance distribution, attendance, and student characteristics using Power BI and SQL.

ADDITIONAL PROJECTS

- C-Level Sales Analytics Dashboard (Power BI)
- Multi-Sheet Sales Analytics Dashboard (Excel)
- AdventureWorks Bike Sales Dashboard (Excel)
- Human Resources Performance & Salary Analytics Dashboard (Excel)
- Supermarket Sales Analytics Dashboard (Excel)
- Retail Sales Data Analysis & Exploration (Python / Pandas)

CERTIFICATIONS & COURSES

- Digital Egypt Pioneers Initiative (DEPI) — AI & Data Science / Microsoft Data Engineer Track | Ministry of Communications & IT, Egypt | Jun – Dec 2025
- Data Analysis Diploma — Route IT Training Center | Oct 2025
- Data Analysis Engineering Diploma — MEC Academy
- Introduction to Data Analysis Workshop
- Marketing Simulation Program
- Communication Course
- Professional Financial Accountant | Electronic Accounting | Accounting Banking | Excel Accounting
